## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of claims 1-4 in the reply filed on 1/12/2009 is acknowledged.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogawa, K., JP 62-297677.
5. Regarding claim 1, Ogawa discloses the claimed invention including a shelf in a refrigerator, (¶ 1, pg. 5, claim 2, '677) having a food on the shelf, (¶ 1, pg. 4, '677) having a heat pump to cool the refrigerator/freezer, (¶ 2, pg. 3, '677) applying an AC and DC voltage simultaneously to the food, (¶ 1, pg. 4, claim 5, '677) wherein the DC voltage is negative. (¶ 1, pg. 5, '677) Ogawa is silent as to placing the food on the

shelf, and cooling the interior of the refrigerator, however one of ordinary skill in the art at the time of the invention would have found it obvious to place the food on the food shelves of Ogawa's refrigerator, to use the heat pump mechanism of the refrigerator/freezer to cool or freeze the food, and to use the disclosed device as intended.

6. Ogawa is analogous art in that it is concerned with the use of high voltages to better preserve food during refrigeration.
7. It would have been obvious to one of ordinary skill in the art at the time of the invention to use the disclosed device of Ogawa for its intended use, by placing a food in the device, turning on the refrigerator/freezer, and applying the high voltage, in order to have a food item that preserves its quality during the refrigerator/freezer storage time.
8. Regarding Claim 2, Ogawa discloses the claimed invention, as above, including that the voltage can be either direct or alternating high voltage. (¶ 1, pg. 4, claim 4, '677)
9. Regarding claim 3, Ogawa discloses the claimed invention, as above, including the device used can be a freezer. (¶ 2, pg. 4, Fig. 1 element a, '677)
10. Regarding claim 4, Ogawa discloses the claimed invention, as above, including the device used can be a refrigerator. (¶ 2, pg. 4, Fig. 1 element b, '677)
